

HORSE FEED

MEMBER OF | ROYAL DE HEUS

RELAX

Pelleted feed for low-loaded horses

The feed is intended primarily for low-loaded horses, hobby and working horses. The Relax feed is possible to use as a substitute instead of oats for less manageable horses who react to oat feeding with restlessness and nervousness. Relax has a balanced ration of minerals and vitamins.

 25 kg

Feed ration for adult horse (500 kg l.w.)

- Feeding horses solely with Relax pellets serve 2–4 kg daily depending on the load.
- Or serve daily 1–3 kg of oats and 2–3 kg of Relax pellets according to workload.

Divide the total daily feed ration into at least two partial rations and adapt it to the breed, age and the condition of the horse.

STANDARD

Pelleted feed for middle-loaded horses

High-molassed feed for all-purpose use is especially suitable for medium-loaded horses. It is also recommended for mares during the last third of pregnancy and during lactation. Also faddy horses are willing to love and accept it.

 25 kg

Feed ration for adult horse (500 kg l.w.)

- Feeding horses solely with Standard pellets serve 2–4 kg daily depending on the load.
- Or serve daily 1–3 kg of oats and 2–3 kg of Standard pellets according to workload.

Divide the total daily feed ration into at least two partial rations and adapt it to the breed, age and the condition of the horse.

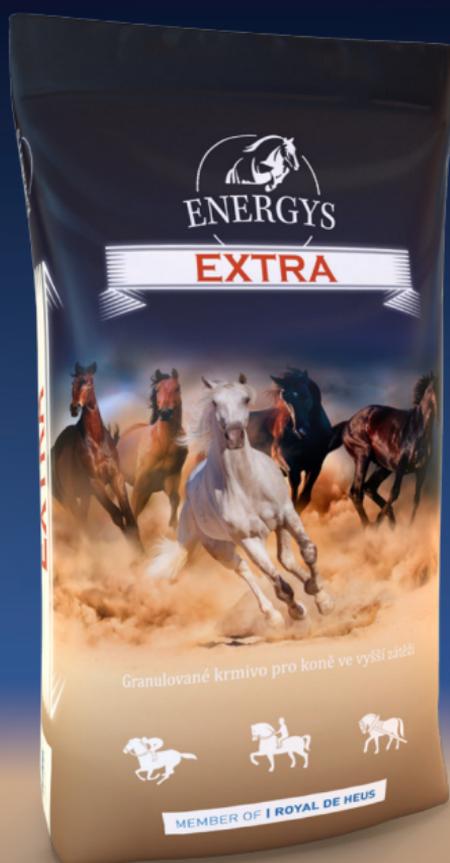

Protein	Fat	Fibre	Ca	P	Se (added)	Vitamin A	Vitamin D₃	Vitamin E
120 g/kg	20 g/kg	120 g/kg	9 g/kg	5.5 g/kg	0.75 mg/kg	15000 m.j./kg	1500 m.j./kg	100 m.j./kg

EXTRA

Pelleted feed for higher-loaded horses

Energy feed with higher content of corn suitable for horses in intense sporting and work load. The favourable ratio of essential fatty acids contained in soybean and linseed oils ensures rapid regeneration.

 25 kg

Feed ration for adult horse (500 kg l.w.)

- Feeding horses solely with Extra pellets serve 2–4 kg daily depending on the load.
- Or serve daily 1–3 kg of oats and 2–3 kg of Extra pellets according to workload.

Divide the total daily feed ration into at least two partial rations and adapt it to the breed, age and the condition of the horse.

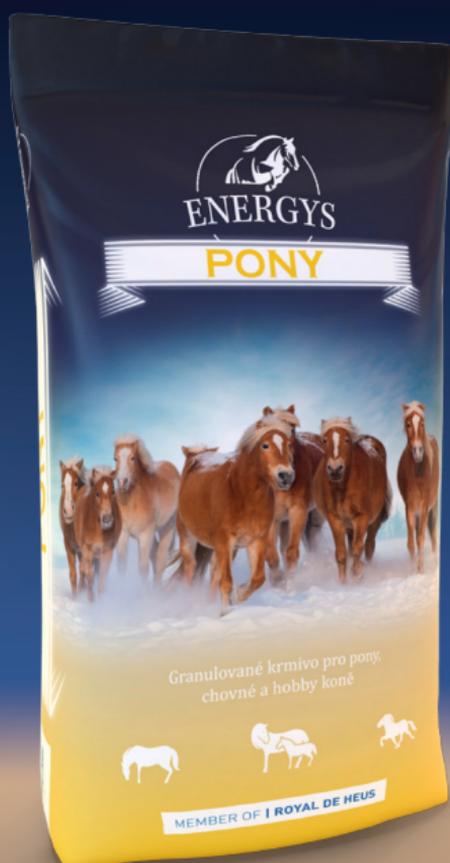

Protein	Fat	Fibre	Ca	P	Se (added)	Vitamin A	Vitamin D₃	Vitamin E
120 g/kg	50 g/kg	85 g/kg	9.5 g/kg	5 g/kg	0.75 mg/kg	15000 m.j./kg	1500 m.j./kg	100 m.j./kg

PONY

Pelleted feed for pony, mares and hobby horses

Feed is intended for workloadless horses and ponies. It is also suitable for mares during the first two thirds of pregnancy. It has a reduced protein and carbohydrate content and a high content of minerals and vitamins. The prescribed dosing helps partly to eliminate the formation of laminitis at well-fed horses.

Feed ration:

- Serve to ponies 0.75–1.5 kg daily according to weight and load.
- Serve to normal horse breeds 2–3 kg daily according to weight and load.

Divide the total daily feed ration into at least two partial rations and adapt it to the breed, age and the condition of the horse or pony.

Protein	Fat	Fibre	Ca	P	Se (added)	Vitamin A	Vitamin D₃	Vitamin E
120 g/kg	25 g/kg	150 g/kg	8 g/kg	5.5 g/kg	1.05 mg/kg	21000 m.j./kg	2100 m.j./kg	140 m.j./kg

BABY

Pelleted feed for foals and young horses

Baby feed is prepared from the finest ingredients with regard to the young growing organism and its needs. High quality soya protein and balanced content of minerals, vitamins and amino acids provide enough nutrients for the healthy development of foals and young horses.

 25 kg

Feed ration for foal:

- Serve to foals up to one year of age daily with 0.5–1 kg of oats and 0.5–1 kg of Baby pellets according to age and breed.
- Serve to foals over one year of age daily with 1–1.5 kg of oats and 1–1.5 kg of Baby pellets according to age and breed.

Divide the total daily feed ration into at least two partial rations and adapt it to the breed, age and the condition of the foal.

Protein	Fat	Fibre	Ca	P	Se (added)	Vitamin A	Vitamin D₃	Vitamin E
170 g/kg	35 g/kg	75 g/kg	13 g/kg	8.5 g/kg	1.05 mg/kg	21000 m.j./kg	2100 m.j./kg	140 m.j./kg

ENDURO

Pelleted feed for high-loaded horses

Feed for horses in permanent high workload. Suitable especially for endurance race and dressage horses, but it is also suitable for very busy sporting horses in other riding disciplines. It has a higher content of highly digestive soluble fibre.

25 kg

Feed ration for adult horse (500 kg l.w.)

- Feeding horses solely with Enduro pellets serve 2–4 kg daily depending on the load.
- Or serve daily 1–3 kg of oats and 2–3 kg of Enduro pellets according to load.

Divide the total daily feed ration into at least three partial rations and adapt it to the breed, age and the condition of the horse.

Protein	Fat	Fibre	Ca	P	Se (added)	Vitamin A	Vitamin D₃	Vitamin E
120 g/kg	75 g/kg	90 g/kg	11 g/kg	6 g/kg	0.75 mg/kg	15000 m.j./kg	1500 m.j./kg	100 m.j./kg

♥ LOVE ♥

Love are heart-shaped dainties with apple flavour for horses. It does not contain any preservatives or artificial colours.

2 kg

HERBIC

Muesli feed for horses positively affecting digestion and airways

We have prepared the Herbic feed in muesli form making it suitable for middle-loaded sports horses. Its composition helps to reduce the stress during sporting performances and transports. Muesli contains a mixture of herbs that have a positive effect on the airways and the digestion of horses.

Feed ration for adult horse (500 kg l.w.)

■ Serve 2–4 kg daily according to workload.

Divide the total daily feed ration into at least two partial rations and adapt it to the breed, age and the condition of the horse.

Protein	Fat	Fibre	Ca	P	Vitamin A	Vitamin D ₃	Vitamin E
115 g/kg	50 g/kg	85 g/kg	11 g/kg	6 g/kg	28200 m.j./kg	5640 m.j./kg	190 mg/kg

COLDMIX

Muesli feed without oat

This muesli is primarily intended for restless and difficult to ride horses. This special free of oat feed reduces the symptoms of so-called "Hot diet" that are particularly appeared with vital and sanguine horses after oats feeding.

Feed ration for adult horse (500 kg l.w.)

- Serve 2–4 kg daily according to load.

Divide the total daily feed ration into at least two partial rations and adapt it to the breed, age and the condition of the horse.

DYNAMIX

Muesli for horses with cereal flakes and linseed oil

Feed in muesli form is designed to maintain excellent condition of very busy sport or older horses. Perfectly balanced muesli which contains supplemented vitamins, minerals and linseed oil makes a feed for excellent condition.

 20 kg

Feed ration for adult horse (500 kg l.w.)

● Serve 2–4 kg daily according to load.

Divide the total daily feed ration into at least two partial rations and adapt it to the breed, age and the condition of the horse.

125 g/kg	65 g/kg	110 g/kg	9 g/kg	4 g/kg	14000 m.j./kg	1700 m.j./kg	335 mg/kg

FIBER

Horse muesli with high proportion of chaff

Fiber is muesli which contains carrot, pea flakes and a high proportion of chaff. It is suitable for older horses as well as for horses with inadequate intake of high quality hay in a daily feed ration or with a rapid feed intake. It supports a good moistening with saliva and chewing up the feed ration.

20 kg

Feed ration for adult horse (500 kg l.w.)

■ Serve 2–4 kg daily according to load.

Divide the total daily feed ration into at least two partial rations and adapt it to the breed, age and the condition of the horse.

OMEGA GOLD

Extruded feed
containing linseed, antioxidants
and high-digestible fibre

Omega Gold is a unique feed composed of extruded linseed and chicory fibre. It contains antioxidants and organic selenium. It has excellent health and fitness impacts on all types and categories of horses, being a source of "slow energy" with a balanced glycemc index.

 20 kg

Feed ration for adult horse (500 kg l.w.)

● Feed 100–200 g of Omega Gold for every 100 kg of live weight.

The total feed ration should be divided into individual feed rations of grain fodders. Adapt these feed rations to the breed, age and the condition of the horse.

NATURE

The NATURE line enables horse owners to compose creatively a feed ration that fully respects the natural horses' needs and their sensitive digestion. Raw materials can form the basis of a feed ration and replace gaps in forages - such as poor hay or inadequate pasture. They are suitable not only for older and sick horses or ones in convalescence, but it is possible to set up a feed ration for even very busy sports horses.

Cornflakes: 15 kg
Mineral: 10 kg, 25 kg
Sugar-Beet pulps: 25 kg
Lucerne pellets: 25 kg
Malt sprouts: 25 kg

The NATURE range offers many options and a wide range of uses:

- Cornflakes – Heat-treated flocculated corn grains
- Mineral – Complete supplement of minerals and vitamins
- Sugar-Beet pulps – Source of pectins, digestible roughages
- Lucerne pellets – Source of proteins, carotenes and other vitamins
- Malt sprouts – Protein feed contains barley malt sprouts
